

TRAILERS

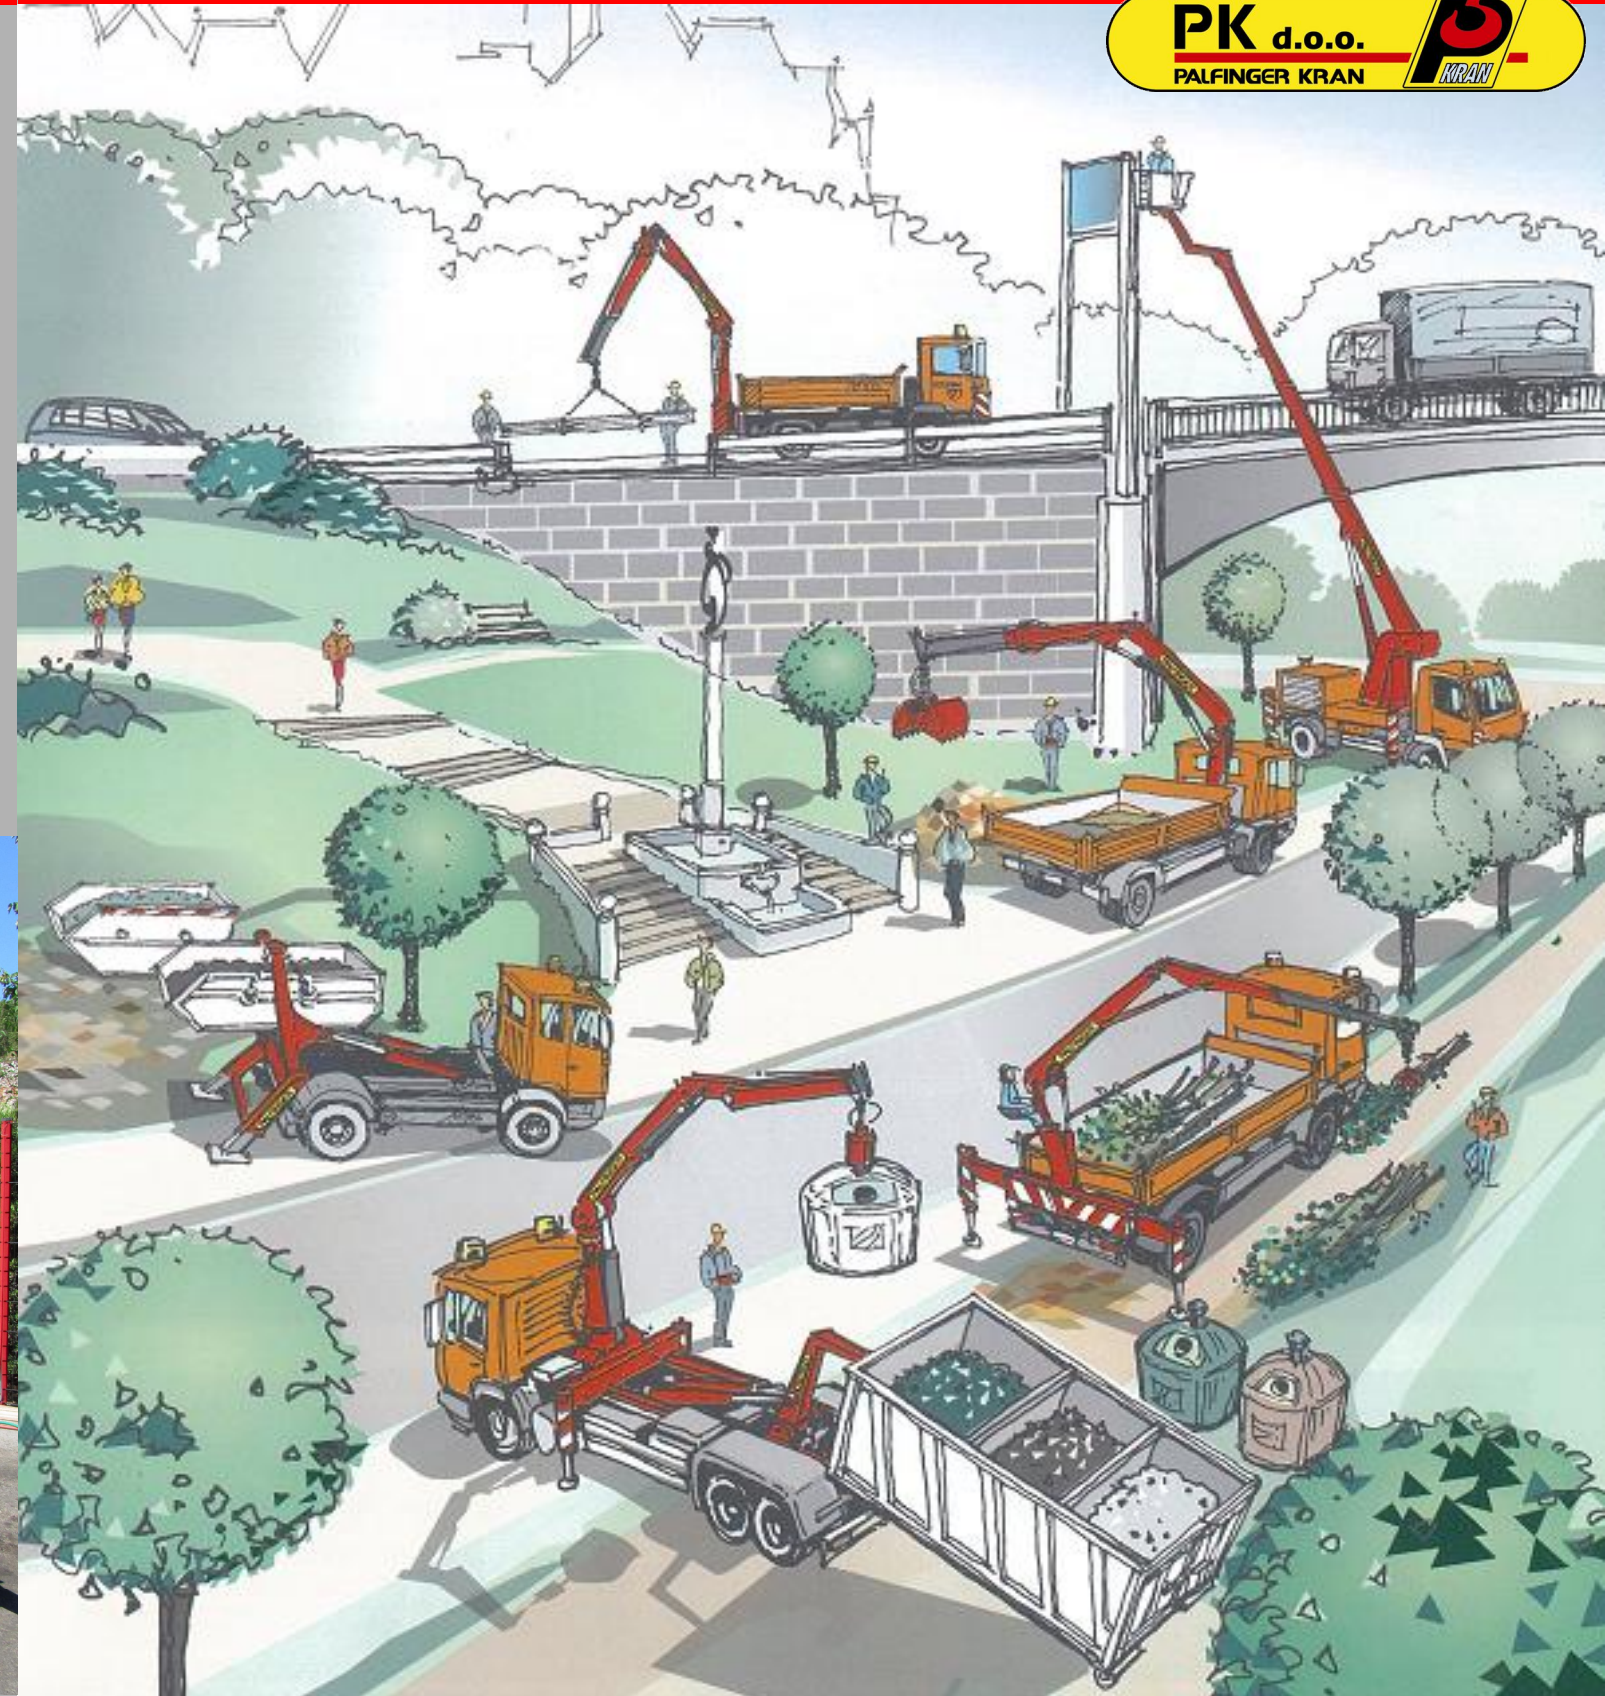

PSK 180

- trailer with rear tipper
- gross weight: 5 - 24 t
- high-quality BPW axles
- ECO tronic system
- profiled $\frac{1}{2}$ +boards made of special steel **WELDOX**
HIGH STRENGTH STEEL
- steel floor made of special steel **HARDOX**
WEAR PLATE
- rear board opening:
 - $\frac{1}{2}$ libro - opening+
 - side opening
 - tipper opening

PRODUCTS FOR COMMUNAL ACTIVITIES

PKM 180

- trailer for transport $\frac{1}{2}$ abroll+ containers
- gross weight: 18 - 24 t
- slideway
- high-quality BPW axels
- ECO tronic system
- air suspension
- pneumatic $\frac{1}{2}$ safety-locking+ containers on trailer
- hook for mechanical security containers

TIPPER BODYBUILDINGS

SELF-COMPACTING SEMITRAILER

- for municipal activities
- custom made bodybuildings for vehicle from 3,5 to 40 t GVW
- tipper and crane with grab for communal waste
- rear tippers for municipal activities
- rear board opening:
 - libro - opening+
 - side opening
 - tipper opening

- rear tipper MK1
- thrust board
- system for emptying cans

Self-compacting semitrailer PPK 020 is designed for waste compacting and transporting from waste transfer stations to the central county waste management centre. In addition to the system of waste compacting, this semitrailer has installed high-pressure wash system of loading space.

PPK 020 P

HOOKLOADER WITH CONTAINER

- used for loading, unloading containers, transport and tipping
- bodybuilding possibilities: hookloader, crane with hookloader and crane in container

PK HOOKLIFT CONTAINERS

- they are characterized by extremely strong σ -profiled boards
- made of ordinary structural steel HARDOX
- **"EXTRA LIGHT" HOOKLIFT CONTAINERS**
- extremely low weight (up to 30% less compared to classical)
- materials used in construction: **DOCOL** HIGH STRENGTH STEEL and **HARDOX** WEAR PLATE

"EXTRA LIGHT" CONTAINERS

PLATFORMS

P200A

- made from high quality steel
- 4 stabilizers
- range from 14 to 24 m
- control commands on the turntable in the basket
- rotation of basket +/-90°
- rotation angle of turntable 370°
- aluminium or PVC basket
- option: basket isolation 1000 V/4 min

- for building maintenance
- for cleaning glass surfaces
- for landscaping and gardening
- for setting advertising panels
- for electrical work

SELF-COMPACTING SEMITRAILER

SKIPLOADER

Self-compacting semitrailer PPK 020 RC is designed for municipal activities and equipped with hydraulic-system for waste compacting. On waste transfer stations the waste is loaded, pushed and compacted by pressure plate and sliding floor. Semitrailer is also equipped with triple control system: manual, cable and radio remote control.

Semitrailer is equipped with an auxiliary engine which make up to PPK 020 RC autonomous i.e. works without being connected to the truck power.

PPK 020 RC

- skiploaders with telescopic arms capacity 2 to 16 t
- extremely low dead weight
- skiploaders can load containers which are located 600 mm below ground
- options of the skiploader:
 - fix or telescopic arms
 - chain with hook (adjustable length)
 - electric, cable or radio remote control

OPEN BOX

- for vehicle from 3,5 to 40 t GVW
- types:
 - open box
 - open box with crane
 - open box with tail lifts
- options of upgrades:
 - with support holder and tarpaulin
 - without support holder and tarpaulin
- boards made of steel or aluminium
- galvanized subframe and frame box
- structures preformed with bolt connection

TAIL LIFTS

MBB PALFINGER

- **cantilever**
capacity 500 to 3.000 kg
- **foldable**
capacity 1.000 to 2.000 kg
- **retractable**
capacity 750 to 3.000 kg

CLOSED BOX

- mobile workshops
- constructed in accordance with customer needs
- options:
 - delivery vehicles
 - service workshops

Other PK bodybuildings

TRUCK FOR TRANSPORTING ANIMAL SECONDARY PRODUCTS

OPERATING WITH RECYCLING CONTAINERS

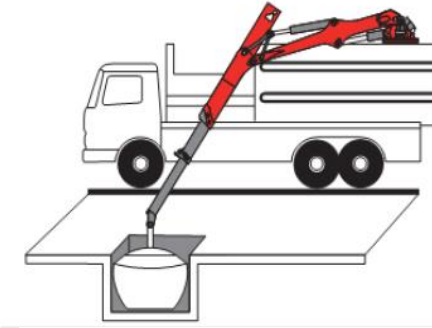

- possibility of installation on vehicles to 26 t GVW
- mechanism for rear loading
- mechanism for side loading container
- rear tipper made of inox
- hermetic closure of cover and rear door
- grab for special application
- measuring device

PALFINGER EPSILON C70G

Crane installation on roof saves an installation space. Allows shorter wheelbase and higher useful volume loading space.

Ideal crane geometry for operating with underground containers.

Excellent hook high for easy emptying container in high boxes.
